SUMMARY

Software engineer with professional Salesforce, JavaScript/LWC, integration, and automation experience. Builds Java and Spring Boot backends through personal projects, with academic and internship foundations in full-stack development, REST APIs, and databases.

TECHNICAL SKILLS

Programming and Web: Java, JavaScript, TypeScript, Python, C++, HTML/CSS, React, OOP, DSA (academic foundations; JavaScript used professionally in LWC)

Backend and Databases: Spring Boot, REST, PostgreSQL, JPA, Flyway, JUnit (ReliableJobs); Node.js/Express, FastAPI, SQL/MySQL, MongoDB (academic/internship foundations)

Salesforce Development: Apex, LWC, JavaScript, triggers, SOQL/SOSL, Flows, Batch/Queueable Apex, Visualforce (basic)

Clouds: Sales Cloud, Service Cloud, Experience Cloud, Marketing Cloud Advanced

Integration: REST APIs, Connected Apps, Named Credentials, External Credentials, OAuth 2.0

Middleware: MuleSoft flows/connectors, transformations, Anypoint Studio, Anypoint Platform

External Systems: Stripe, PandaDoc, DocuSign, Clay

AI and Data: Agentforce service agents/actions, Data Cloud DLO/DMO mapping, segmentation

Tools and Delivery: Git/GitHub, Salesforce CLI, VS Code, Postman, Jira, Apex testing, Nebula Logger

PROFESSIONAL EXPERIENCE

Associate Technical Consultant | Blueflame Labs | July 2025 - Present

Training from July 2025; Salesforce/MuleSoft implementation work since December 2025.

- Built interconnected LWC forms and quote builders; debugged browser issues and traced Apex test failures to memory consumption from multiple Salesforce Flows.
- Built, tested, and deployed MuleSoft APIs and integration flows connecting Salesforce, SFTP channels, and third-party applications; implemented transformations and authentication and configured API catalog entries.
- Implemented Nebula Logger in Apex and Flows; tested callouts and asynchronous Apex and deployed dependency-based metadata packages using Salesforce CLI, Git, and change sets.
- Collaborated with other developers on LWC component testing, Flow investigations, and permission-set troubleshooting while independently delivering assigned implementations.

Backend Developer Intern | Celebal Technologies | July 2024 - September 2024

- Built backend services and REST APIs for an employee management application; developed a WebSocket chat application with token-based authentication and Node.js task automation.

PERSONAL PROJECTS

ReliableJobs | Java 21, Spring Boot, PostgreSQL

- Built a task-processing API where users submit synthetic CSV-summary or record-validation jobs, inspect attempts, retrieve results, and request cancellation or retry.
- Implemented user-scoped idempotency, a durable PostgreSQL queue, lease-based recovery, bounded retries, and session-protected owner access.

PrakritiPal | React, FastAPI, WebSockets, SQLite | Academic Project

- Built a React chat interface connected to a FastAPI WebSocket backend for a questionnaire-driven educational chatbot.
- Used SQLite/SQLAlchemy for chat and questionnaire data, with model-backed conversational responses and interactive message rendering.

EDUCATION

B.Tech., Computer Science and Engineering | Noida Institute of Engineering and Technology | 2025

Class XII | Kunwar Convent School | CBSE | 2020

Class X | Holy Cross School | ICSE | 2018
