Vijaya Rani

Salesforce Integration / MuleSoft Developer

er.vijayarani7@gmail.com | +91 7310137813 | github.com/Kvrs16 | in.linkedin.com/in/vijaya-rani-7k111

SUMMARY

Salesforce integration developer building and deploying MuleSoft APIs, Apex REST endpoints, and connected business workflows. Hands-on experience with Salesforce-to-SFTP connectivity, authenticated integrations, document automation, and end-to-end troubleshooting.

TECHNICAL SKILLS

Integration development: MuleSoft, Anypoint Studio, Anypoint Platform, REST APIs, SFTP, data transformations

Authentication: OAuth 2.0, Named Credentials, External Credentials, access controls

Salesforce: Apex, Lightning Web Components (LWC), JavaScript, SOQL, Salesforce Flow, Batch Apex, Queueable Apex

Systems and delivery: Stripe, PandaDoc, DocuSign, Clay, Nebula Logger, Git, Salesforce CLI, API testing

PROFESSIONAL EXPERIENCE

Associate Technical Consultant | Blueflame Labs | July 2025 - Present

Training from July 2025; Salesforce/MuleSoft implementation work since December 2025.

- Built, tested, and deployed MuleSoft APIs and integration flows connecting Salesforce, SFTP channels, and third-party applications; implemented transformations and authentication and configured API catalog entries.
- Diagnosed Mule application failures using Anypoint Studio, application logs, and Anypoint Platform; separated complex flows and tested Clay table imports, exports, and Salesforce synchronization.
- Implemented a Stripe invoice endpoint using Apex REST and Salesforce Sites; configured and tested the data flow through receipt creation and client email delivery.
- Configured PandaDoc templates and bidirectional synchronization across opportunities, quotes, quote line items, and custom objects; implemented DocuSign document generation, merge fields, signature tracking, and record updates.
- Built bulkified Apex territory-assignment workflows with trigger handlers, Batch Apex, and division-based Queueable Apex; propagated account changes to opportunities and updated account teams and role-specific fields.
- Built Experience Cloud user-provisioning and contact-matching workflows; configured profiles, permission sets, sharing rules, field-level security, Named Credentials, External Credentials, and OAuth 2.0.
- Implemented Nebula Logger in Apex and Flows; tested callouts and asynchronous Apex and deployed dependency-based metadata packages using Salesforce CLI, Git, and change sets.
- Collaborated with other developers on LWC component testing, Flow investigations, and permission-set troubleshooting while independently delivering assigned implementations.

Backend Developer Intern | Celebal Technologies | July 2024 - September 2024

- Built backend services and REST APIs for an employee management application; developed a WebSocket chat application with token-based authentication and Node.js task automation.

EDUCATION

Bachelor of Technology, Computer Science and Engineering | 2025

Noida Institute of Engineering and Technology

ADDITIONAL KNOWLEDGE

Academic experience: Java, Spring Boot, and full-stack application development; currently refreshing these skills.
